(54) Title: STIRRUP LEATHER BUCKLE

(57) Abstract: A stirrup leather (12) is  
installed over a stirrup bar (14) by means  
of a buckle (24a). The buckle frame  
has a curvature which forms a recess  
in which the stirrup bar (14) is received,  
which allows the buckle frame to sit  
closer to the saddle (10) than is possible  
with a planar buckle. This results in an  
arrangement which is more comfortable  
under the thigh of the rider.
